  63rd IFATCA Annual Conference
   IFATCA
          Dear Member Associations,
          On behalf of the International Federation of Air Traffic Controllers' Associations (IFATCA), it is our great
          pleasure to extend a warm and enthusiastic welcome to the 63rd IFATCA Annual Conference in the vibrant
          city of Singapore.
          This year's conference carries a theme of profound significance, "Invest in People: The Future of ATM." In a
          world where the aviation industry is rapidly evolving, placing a strong emphasis on human capital is crucial
          for shaping the future of Air Traffic Management (ATM). Your presence and participation at the conference
          demonstrates your commitment to this vision, and we are thrilled to have you join in this significant
          The annual conference provides us the perfect opportunity to share knowledge, insights, and best practices
          in the field of air traffic control, as well as to promote collaboration and exchange among industry experts,
          professionals, and thought leaders from across the globe.
          Singapore, with its rich cultural heritage, modern infrastructure, and unwavering commitment to aviation
          excellence, serves as an ideal backdrop for our discussions and deliberations. We encourage you to take the
          opportunity to explore this beautiful city and experience its unique blend of traditions and innovation, while
          engaging in the professional discussion at the conference.
          As we delve into the conference's various sessions, workshops, and networking opportunities, we hope to collectively chart the course for the future of ATM. Your active participation and engagement will
          undoubtedly play a pivotal role in shaping the outcomes of this conference.
          Thank you for joining us in this endeavour, and let us work together to invest in people and secure a
          brighter future for air traffic management.

  IFATCA PRESENTS 100 Years Air Traffic Control 1922-2022 an incomplete history
   IFATCA
                                           100 Years
                                            Air Traffic Control
                                                                    1922-2022
                                                             an incomplete history
          On the occasion of 100 Years of Air Traffic Control in 2022, the International Federation of Air Traffic
          Controllers' Associations, IFATCA, commissioned a book that examines how air traffic control started and
          changed over the past century
          Air traffic control was not invented. It evolved out of necessity, following hindsight-realisations that aviation
          could be made safer and more efficient. In many cases, the trigger was one or more accidents that created a
          The book does not aim to be an all-encompassing, detailed account but looks key events that shaped our
          profession to what it is today.
                                                                                  IFATCA
                                                  100 YEARS

  ICAO Global
  Updated guidance to States on flights over or near conflict zones
          ICAO has released updated guidance on 23 October 2023 to help aviation regulators and operators manage
          their airspace in times of conflict, including the decision on whether or not to allow flights over or near
          conflict zones.
                                                                                                                   Learn more

          https://learningzone.eurocontrol.int/doc/seslex.htm
                                                                                               Learn more (click links above)
  New European Aviation Overview: Latest trends for the period 16-22 October
          The latest European Aviation Overview (16-22 October) shows traffic in the first 22 days of October was at
          94% of 2019 levels – in line with the EUROCONTROL Monthly Traffic Forecast, Base Scenario. For the week
          16-22 October, en-route ATFM delays were below 2022 levels, amounting to just below 36,000 minutes a
          day (with capacity & staffing accounting for the largest share of that at 65%). Arrival punctuality was 69.8%, 11.1 percentage points lower than 2019, with departure punctuality 10.5 percentage points lower
          compared to the same pre-pandemic period at 65.8%. However, this week's punctuality figures were slightly
          better than the equivalent week in 2022.
          Other key data in this edition:
                   The network recorded 29,768 average daily flights (+8% vs 2022), remaining slightly
                  below (-1.9%) the previous week and standing at 93% of 2019 levels for the week, 94%
                  for the month to date.
                  On average, the top 10 carriers kept their capacity similar compared to the previous
                  week.
                  Outside Europe, the busiest regional flow is between Europe and the North Atlantic,
                  outpacing the flow Europe ↔ Middle-East, affected by reduced traffic from/to Israel.
                   ■ EUROCONTROL billed 867M€ in en-route charges for September 2023 flights, 16% above
                  the amount billed for September 2022 flights. On a year-to-date basis, EUROCONTROL has
                  billed 6,932M€ in 2023, +21% compared to 2022, reflecting more service units and higher
                  The average jet fuel price stood at 3.02 USD/gallon on 20 October 2023, having
                  increased (+9%) over ten days. Current prices have increased by 6% compared to the
                  beginning of the year.
                                                                                                                 Learn more

  New #RTAB podcast asks: what can aviation do to advance diversity, equity and
                                      RAISING THE AVIATION BAR
          How can aviation become more diverse and inclusive?
          Our new #RTAB Raising the Aviation Bar podcast - the series that brings the aviation community
          topical insights into aviation's hottest challenges, from the experts and business leaders working to tackle them - talks to Milena Bowman, executive manager for airspace, systems and procedures at
          EUROCONTROL's Maastricht Upper Area Control Centre and Tamara Pejovic, senior aviation expert in our
          Aviation Sustainability Unit, to find out how they are #RaisingTheBar for aviation to achieve greater diversity
          and create an inclusive working environment.
          As a technology-driven sector, aviation needs to attract the brightest minds, people who will be able to come
          up with the innovative solutions the sector needs to reduce its environmental impact and help operational
          actors manage increasingly complex airspace. Milena and Tamara share their personal stories and talk about
          the DEI initiatives they have been contributing to. These include EUROCONTROL's cooperation with ICAO on
          their Next Generation Aviation Professionals Programme, our participation in the European Commission's
          Ambassadors for #DiversityInTransport Network, our cooperation with non-profit organisation AviAII -
          Aviation for All as well as a range of other initiatives designed to promote careers in aviation to diverse sets
          of schoolchildren, school leavers and young professionals.
          #RTAB podcasts - strategic discussions, personal insights. Follow on your favourite platform: Podbean,
          Spotify, Google podcasts or Apple podcasts!
                                                                                                                 Learn more
  European ATM Master Plan campaign - Vision Workshop wrap up
          Dear all,
          See attached. IFATCA did not participate due to the lack of contract.
          In the meantime the contract has arrived and was signed yesterday by our President and CEO Mr. Duncan
          Yours
          Marc
                               EUROPEAN ATM
                              MASTER PLAN CAMPAIGN
                               Vision Workshop
          Dear European ATM MP update community,
          It was a great pleasure to meet you all during the last 2 days for the Vision Workshop.
          It was a special moment with a lot exchanges and listening during some surprising working sessions. We all thank DLR moderators for their support during this initial journey towards ATM MP update campaign.
          I share with all of you the wrap up slides of the workshop so that we are all synchronized on it, especially on
          the immediate next step: preparation for each next WG meeting, proposed to be on 07/11/2023. Elected
          WG chairs will be contacted soon to secure the first meeting.
          All material has been collected and will be made available to all in few days.
          You can contact us for any request/question/information related to the ATM MP update campaign at ATM-
          MP@sesarju.eu.
          Have a nice week end and ready to hear more from you asap.
                                                                                                                 Learn more
  EUROCONTROL Aviation Learning Centre webinars and events
              Learning Zone
          Dear Webinar attendees,
          We are pleased to invite you to the webinars which will take place in the coming weeks.
          Will drones cover our skies? - Part 3 of 4 - USSP practical lessons learned
                  Date and time: Monday 30/10/2023 - 10:00 CEST
                  Duration : 60 minutes
                  Presenter: Eyal ZOR : CEO & Founder @ Airwayz
                                                       REGISTER HERE
          Unmanned Aerial Systems (Drones) show great potential to change the way we utilize our sky for
          commercial purposes, such as delivery, security, first response and more. In order to integrate them safely and efficiently within our airspace, the EU aviation safety agency (EASA), together with other EU stakeholders, have initiated the 'U-Space' regulatory framework. U-Space is eventually the foundation for
          the drone ecosystem stakeholders to enable drone operations harmonically.
          One of the main key enablers for U-Space is the U-Space Service Provider, USSP, which is responsible for
          interconnecting and synchronizing different drone operators, managing the low-airspace, connecting various
          stakeholders and acting as a 'bridge' between the industry and general authorities for safe operation
          In this series of four webinars you will hear from Airwayz, a USSP company operating globally, about the foundations of U-Space & USSP, the basic services & competences, the gained experience to date and about
          the current & future business models which will support the ecosystem for scalable and valuable drone
          services for the public.
                          Episode 1 - An introduction to USSP's
                          Episode 2 - USSP systems, technologies and competencies
                           Episode 3 - USSP practical lessons learned
                          Episode 4 - USSP business models and economic considerations
          Social acceptability on Urban Air Mobility: assessing public perceptions
                  Date and time: Friday 03/11/2023 - 14:00 CEST
                  Duration: 60 minutes
                  Presenter: Palak PANCHAL : Mobility Specialist @ LuxMobility
                                                       REGISTER HERE
          This webinar is part of the series of two online lectures on the topic of "Facilitating Emergency Medical
          Services (EMS) UAM in European cities". This 1st lecture will discuss about how to engage with citizens on
          the topic of Urban/Advanced Air Mobility and will provide a brief on the different engagement strategies. It will explore current attitudes of public their main concerns and perceived benefits from Urban Air Mobility and drone technology based on current research from AiRMOUR. In a second part It will provide an overview
          and identification of various stakeholders to be involved in the local UAM discussions and the development of
          strategies for effective collaboration to ensure the successful integration of Urban/Advanced air mobility into
          existing environment
                                          Our webinars are open for registration
                                       Feel free to share this email with your colleagues!
                                                                                               Learn more (click links above)

 Other Information
  Tragic consequences of a deviation from standard working practices on TWR night
  shift
          On 18 March 2019, an aircraft had just touched down at Subang when it collided with an unseen and
          apparently unlit vehicle destroying it and critically injuring its occupant. Significant left wing leading edge
          damage was then found. The destroyed vehicle and another one had been cleared onto the runway by ATC
          for routine runway maintenance purposes by a single controller who then failed to tell another colleague
          taking over that the runway was occupied. Use of single controller position manning was non-standard and
          airside vehicle and aircraft communications were routinely using different communication channels
          preventing situational awareness.
                                                                                                                 Learn more

  @Issue 58 of airspace magazine has arrived
          Welcome to this 58th issue of Airspace Magazine.
          As air navigation service providers continue to make the skies more efficient, we look at the latest
          developments in trajectory-based operations (TBO).
          Demonstration flights have returned excellent results, and the aim is to implement TBO as quickly as
          possible.
          New efficiencies are also the order of the day in articles on CANSO's Complete Air Traffic System (CATS) and from CANSO's Director General, Simon Hocquard. Learn how air navigation services are building a
          strong platform for future success.
          We also look at cybersecurity and the misconceptions surrounding staff shortages. These are important
          topics and will likely remain so for many years to come.
          Finally, we take a look at the key issues in safety in light of the upcoming CANSO Global Safety Conference
          in Dublin, Ireland.
          Happy Reading!
                                                                                                                 Learn more
  Weekly Security Articles of Interest – 27 October, 2023
    TERNATIONAL
          Sent by: SAE Staff Representative: Dorothy Lloyd, Standards Specialist, Aerospace Standards
          The articles have been curated by an independent team of subject matter experts to raise awareness of
          contemporary cyber-physical security issues with systems, software and hardware assurance.

  That Was The Week That Was 16-20th October 2023
                             Aviation Advocacy
          What is so complicated about this?
          Last week, you may recall, I argued that the capacity crunch in aviation was entirely our own fault, try as we
          might to shift the blame elsewhere, because you get the capacity you pay for. Our refusal to pay for spare
          and stand-by capacity is now becoming a real issue for the industry, but still we look elsewhere for the
          answers, mystified that the answers are not there. Or perhaps more accurately, we look elsewhere for the
          blame, instead of looking in the mirror.
          On cue. IATA helped our understanding this week with a chart. The chart of the week, no less. A picture
          being worth a thousand words and all that, you might think that would make things clear. Well, it did, but
          then subtracting two words from the thousand on the table, IATA muddled the water by noting that 'it's
          complicated' as if the situation about capacity shortages in aviation are akin to relationships on Facebook.
